Sir:

In response to the final Office Action dated February 27, 2002, please amend the application as follows:

In the Claims:

Please amend claims 1, 5-7 and 14 to read as follows:

1. (Twice Amended) A method of qualitative and quantitative analysis of microbial population(s) comprising:

contacting microorganisms present in a sample with at least one specific probe to form a probe-target complex, wherein the specific probe recognizes a RNA target sequence under conditions favorable to in situ hybridization in whole cells,

extracting the hybridized specific probes from their target by adding a denaturing agent to denature the probe-target complex, and
